

5 Dog Poisons

Hidden Around You!

Human medicines

Medicines that prove effective or lifesaving for Humans can have an opposite effect for dogs. Even a small dosage can cause a lot of damage.

Common signs

Sickness, diarrhoea, kidney failure

Grapes

Grapes and raisins (dried grapes) are healthy snack for you but your dog could end up having a kidney damage.

Common signs

kidney failure

Flea and Tick Shampoos

This is why doctors advise you to keep your dog away from shampoos and tick meds. This can cause serious problems in dogs.

Common signs

Acting drunk, Coma, Lethargy, Slow heart rate, abnormal blood pressure, diarrhoea, drooling

Vitamin D

Basically Vitamin D acts as a source for dogs to regulate balance and retention of calcium and phosphorus. However, too much of Vitamin D can cause sickness, diarrhoea, convulsions, or kidney failure.

Common signs

Sickness, diarrhoea, convulsions, abnormal heart beat, kidney failure

Chocolates

Theobromine, a toxic chemical, in chocolates affects Dogs' metabolism rate severely. A small amount of chocolate may cause vomiting and diarrhoea, and large amounts can be deadly.

Common signs

Agitation, tremors, convulsions
