

8 DOG GROOMING TIPS

Planning a grooming session for your pet? Then you must read this!

A dog of any breed will need grooming to look and feel at her best. Grooming your dog appropriately may take a few minutes to quite a few hours each week, depending on the breed and coat type. Not all pet owners have the same time to groom their pet and take care of them. For the one who don't have time, they need to have 'pet groomer'. It is quite important to keep the pet's nails, fur, teeth, paws in good condition throughout all seasons.

What are your grooming goals – a well-trimmed family dog or preparing a dog for conformation showing? Finding a talented show groomer may be much more difficult than finding an excellent groomer who specializes in fabulous cuts for pet dogs.

Today, Google can help you in locating a good dog groomer even better than the trusted friends and relatives. So check for a professional groomers or learn tricks like special health care techniques, behavior, shows, tools, creams, lotions etc., from the pet experts by signing in to the online free portals, websites. Also ask for the typical rates for the services as it differs from place to place, if you are hiring an assistant.

Ask for several questions to the pet groomer like how long have you been in business? How did you learn to groom? Has an animal ever been injured in your care? What experience do you have grooming dogs of this breed? Can you provide references from other area pet professionals (vets, trainers, etc.) and clients?

Try attending the grooming sessions when the groomer is home. It is the best time to train your dog and make the pet feel how good grooming can and give them surprise treats. Observe the pet for first few sessions and know what makes it happy in the whole session.

The tools used during grooming sessions are also important. The groomer should recommend dog grooming tools and supplies to help maintain dog's fur in the good condition in between the sessions.

Dog Grooming Tips:

Here are some tips for you are looking for assistant pet groomer, or you can even make the grooming sessions more playful with the pets when doing it yourself.

- Research on the dog's breed and the coat type and use the grooming tools according to that.
- Take advice from the veterinarian on grooming techniques to make it more interesting.
- Make the grooming sessions short and pleasant. Play the music your pet likes, so it enjoys. Light a lavender candle for the good fragrance. You know pets also like the good smell!
- Start grooming sessions when it's in puppyhood.
- When the dog feels uncomfortable during grooming, study when it feels comfortable and then starts grooming. Let the dog come to you.
- Many trainers offer classes on how to use positive reinforcement techniques to the dog owners so they can make the both grooming and veterinary husbandry sessions easy.
- Start bathing your dog ones a week.
- Don't cut the fur of the dogs so closely especially during summers. You believe it or not, the fur on the body makes them regulate the body temperatures. Depending on the breed of the dog the thickness must be maintained.
- Visit a veterinarian if you see any signs of an unhealthy coat or skin problems – bald spots, scaly patches, excessive dryness or oiliness, open sores of any kind, hot spots, etc. These coat problems can be symptoms of underlying problems ranging from dietary deficiencies to allergies, extreme stress, or hypothyroidism.

Waggle Pet Temperature Monitor

Waggle's RV Pet Temperature Monitor can monitor your pet's environment temperature in real-time may it be an RV/car or room. The device will send an automated SMS, E-mail alert when the temperature reaches a critical level. So be alerted and not alarmed of your pet protection .
