There are times when you might get frustrated with your pet, but you have to be patient and give him time to understand things.

### BE AFFECTIONATE :

Being affectionate with your pet will strengthen your bond with him, and he will trust you more. This will result in him being obedient.

### NEVER DECEIVE YOUR PET :

While training, if your pet has made a mistake, never deceive him by showing a reward and later punishing him. This will break his trust.
