

— HOW TO FIND THE PERFECT —

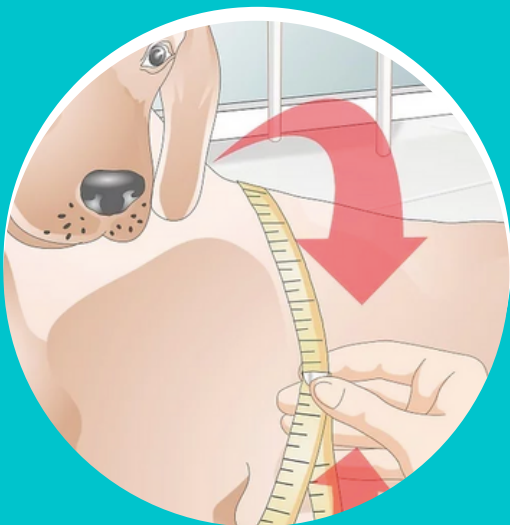

HARNESS SIZE

FOR YOUR DOG

Waggle

STEP 1: MEASURE YOUR DOG'S CHEST

Measure the broadest part of your dog's chest using a measuring tape. Make sure that the tape is wrapped securely around them. This is to ensure that your measurement is correct and not too loose or too tight.

STEP 2: MEASURE YOUR DOG'S NECK

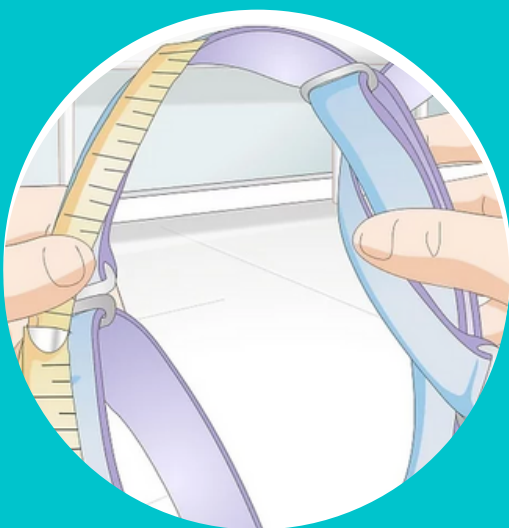

Your dog's neck is the thinnest part in his/her body. Measure the neck and make a note of it. This will be useful when you have to select the collar.

STEP 3: CHECK THE WEIGHT OF YOUR DOG

The harness solely depends on the weight of your dog. The size of the harness for the same breed will change depending on your dog's weight. The harness that you choose should give you the power to control your dog when you take him/her out.

STEP 4: CHOOSE THE HARNESS

Harness generally comes in 4 different sizes (Small, Medium, Large, Extra Large). A few shops might have XXL. Based on the measurements that you have taken choose the size that will fit your dog.
