

SANTA SPILLS THE BEANS! IS THIS HOW HE PROTECTS HIS PETS?

"HO HO HO..."

Winter is just cruel to animals! But I found a perfect way to protect my four-legged companions with a nifty magic device.

- It keeps an eye on Temperature & Humidity 24/7
- It has a built-in GPS
- Long-lasting rechargeable battery
- It works with Verizon 4G, so I don't have to rely on WiFi anymore."

Behold the ultimate lifesaver!

"Waggle Pet Monitor monitors the **ambient temperature** and sends me **alerts** via **text/email/app** whenever the temperature exceeds the set level.

Waggle also sends **power loss/back alerts, low battery alerts, network alerts**, and has geofence.

I can connect up to 5 mobile contacts so my elves and I will have peace of mind no matter the season, knowing our pets are safe."
