

Why RVing is the Safest Travel Option?

In the Post Covid World

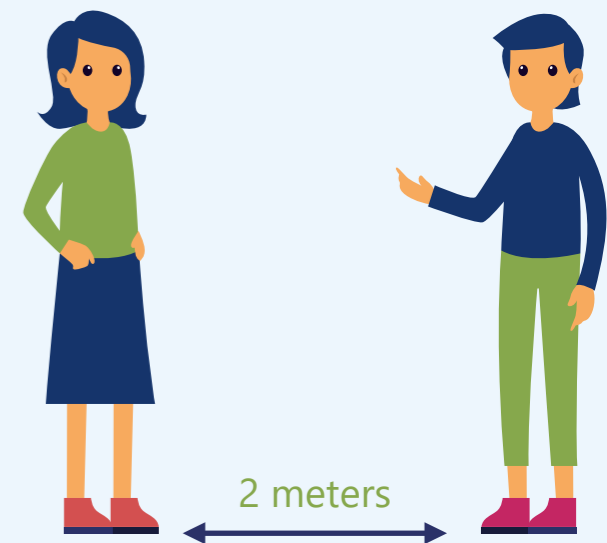

- With the recent outbreak of Covid-19, Social Distancing has become the new norm.
- Thankfully RVing turns out to be a safe option for travel lovers this summer.

Why RVing the safest choice over other travel mediums?

1) Practice Physical Distancing

How far to stay away from the crowd is up to you.

2) Breathe Easy

Unlike in air travel or cruise, you need not be squeezed inside an enclosed space.

3) Ensure Your Food is Safe

You'll know who cooked your meals and how hygienic it is.

4) Sleep in your bed

Not to worry about finding a pandemic-free hotel to stay.

5) Vacation on Your terms

You are the pilot; You are the Captain. You decide your destination at any point in your travel.
