

# When is it Too Cold to Walk Your Dog?

## Temperature Thresholds

Below 45°F: Small dogs may need a coat; below 20°F: Keep walks short.

## Warning Signs

Shivering, paw lifting, or pale skin signal cold distress.

## Protective Gear

Use dog coats, boots, and paw balm to prevent cold related issues.

## Dog-Specific Needs

Consider breed, age, and health when planning winter walks.
